

Provide Impervious Surface Calculations on the plans to determine if LID applies.

Example:

<u>Existing Impervious Surface</u>		<u>New Impervious Surface</u>	
Dwelling	2,300 sf	Dwelling Addition	800 sf
Detached Garage	800 sf	Covered Patio	150 sf
Barn	612 sf	Garage Addition	300 sf
Concrete Driveway	<u>548 sf</u>	Concrete Driveway	<u>120 sf</u>
Total (existing): 4,260 sf		Total (new): 1,370 sf	

Conclusion: $1,370/4,260 = 32\%$. This is less than 50% of the existing impervious surface area, therefore LID Requirements do not apply.

If > 50%, LID requirements apply.
